

AYOUB BOUDAUD

Software Engineer - Full Stack

Experienced Full-Stack Software Engineer with over seven years of building scalable and efficient applications. Strong focus on .NET, with solid experience using Angular and React. Skilled in delivering high-quality solutions, collaborating across teams, and driving projects from concept to deployment. I am eager to embrace new technologies, and thrive in challenging and collaborative environments.

PROFESSIONAL EXPERIENCE:

Terabyte Software, Kenitra – Morocco

December 2021 – Present

December 2023 – Present: Technical Team Leader

- Lead the development of scalable backend services with a focus on performance, security, and code quality.
- Define architecture and manage feature delivery using Agile methodologies.
- Guide team members with technical mentoring and modern engineering practices.
- Collaborate with stakeholders to define requirements and ensure successful project outcomes.
- Implementing and deploying apps using Azure Pipelines or Docker, based on project needs, across Azure Portal, Simply and other environments.
- Developing an AI-powered application leveraging Azure AI Foundry, delivering intelligent features aligned with business needs.

December 2021 - Present: Backend Software Developer

- Developing, and enhancing microservices and APIs using .NET (all versions).
- Writing clean, maintainable, and testable code (Unit and integration testing).
- Optimizing and refactoring code by applying advanced architectural patterns and DevOps workflows (Azure Pipelines, Docker).
- Participating in design and code reviews, ensuring high code quality with tools like SonarCloud.
- Implementing Infrastructure as Code (IaC) and maintaining CI/CD pipelines.
- Monitoring and optimizing Azure cloud services, and resolving critical BUGs.
- Ensuring SaaS reliability and addressing security vulnerabilities proactively.
- Administering SQL databases across staging and production environments.
- Driving continuous improvement and promoting the adoption of innovative technologies.

Freelance Software Developer

January 2019 – December 2021

Worked independently on diverse software development projects using PHP, JS, and C#

- Designed and developed web and desktop applications tailored to client needs using PHP, C#, and the .NET framework
- Built and integrated APIs, managed databases (SQL Server, MySQL), and delivered secure, maintainable code.
- Collaborated directly with clients to gather requirements, deploy solutions, and provide ongoing technical support.

Régie Autonome Kenitra (RAK) - Morocco

April 2019 – September 2019

Joining as a junior software developer - Paid internship, to:

- Designed and developed applications from scratch using PHP, Java (Android application), and C# on Windows platforms with the .NET framework.
- Redesigned the organization's website architecture using design tools such as Adobe XD and Photoshop.

Ministry of the Interior Kenitra - Morocco

December 2018 – March 2019

Junior PHP Developer – Training internship, to:

- Analyzed challenges in the archiving domain to produce a detailed specification document. Designed and developed a custom application to address organizational archiving issues, integrating multiple protocols and a secure, standards-compliant database architecture.

EDUCATION AND DEGREES:

2022 – 2023 - Professional License Degree: INFORMATION SYSTEMS AND BIG DATA
Higher School of Technology of Salé.

2018 – 2021 - Fundamental License Degree: LINGUISTIC STUDIES STREAM
(ETUDES ANGLAISES).

Ibn Tofail University – Faculty of Languages – Letters and Arts of Kenitra

2016– 2018 - IT Diploma: Technician Specializing in IT Development
Specialized Institute of Applied Technology in Industry (ISTA) Kénitra.

2015 – 2016 - Baccalaureate: LIFE AND EARTH SCIENCES
High school: IDRIS First of Kenitra

CONTACTS:

- Phone: 212 695666067
- LinkedIn: ayoub-boudaoud-a08703180
- Email: ayoubboudaoud136@gmail.com
- Address: Rue 153 NR 321 Afca Kenitra
- Portfolio: [My Portfolio](#)

SKILLS:

- Languages** : C#, JavaScript, TypeScript,
- Frameworks & Technologies** : .NET Framework (4.x), .NET Core (3.1), .NET (6, 7, 8, 9), ASP.NET, ASP.NET MVC, ASP.NET Core, Blazor (Server & WebAssembly), React.js, AngularJS, Tailwind CSS, Entity Framework (EF)
- Databases & Storage**: SQL Server, MySQL, Redis, Firebase, SQLite, MongoDB, PostgreSQL
- Architectures & Design Patterns**: Microservices, RESTful APIs, API Gateways, Clean Architectures (Domain Driven Design, Onion Architecture, Vertical Slice Architecture)
- Cloud & Hosting**: Azure AI Foundry, Azure Portal, Simply Webhosting
- DevOps & Tools**: CI/CD pipelines, Git, Docker, SonarQube
- Software Development Principles**: SOLID, YAGNI
- Methodologies & Tools** : Agile (Scrum), DevOps, Jira
- Testing**: Test-Driven Development (TDD), Unit Testing, Integration Testing, Functional Testing

LANGUAGES:

- English: Fluent
- French: Conversational

HOBBIES:

- Fitness, Full contact
- Horseback riding
- Football
