PROFESSIONAL EXPERIENCE

Terabyte Software, Kenitra - Morocco

December 2021 - Present

December 2023 - Present: Team Leader

As a Team Leader, I manage the entire solution while guiding my team technically and overseeing the backend development.

- Leading the development of backend services, ensuring high-quality code and performance.
- Managing project timelines, app features, and task assignments to optimize team productivity.
- Conducting meetings to align team efforts and address project challenges.
- Providing innovative solutions and technical guidance to team members.
- Collaborating with clients to gather requirements and ensure satisfaction with project deliverables.
- Overseeing the implementation of best practices for code quality and project management.
- Facilitating communication within the team to foster a collaborative work environment.

December 2021 – Present: Backend Software Developer

In my role as a .NET Backend Software Developer, I worked in an Agile environment to:

- Develop, test, and enhance Microservices/API features, leveraging .NET 6, 7, and 8.
- Optimize and refactor existing code with advanced architectures; utilize Azure DevOps/Portal for streamlined workflows.
- Write clean, readable, and maintainable code, prioritizing testability; perform unit, integration, and functional tests.
- Participate in design and code reviews, utilizing SonarCloud for code quality analysis.
- Swiftly resolve issues, including bugs and critical fixes; actively monitor Azure cloud services performance.
- Effectively manage project features, tasks, and documentation using Azure DevOps boards.
- Implement Infrastructure as Code (IaC) for seamless operations; maintain CI/CD pipelines for .NET 6 and 7 projects.
- Ensure the reliability and availability of Software as a Service (SaaS); address vulnerabilities identified by SonarCloud.
- Minimize cyclomatic complexity and enhance code coverage with comprehensive testing.
- Providing valuable insights for problem-solving and continuous improvement.
- Lead end-to-end application development, incorporating innovative technologies and tailored solutions.
- Manage SQL server in staging and production; resolve reported database issues using Azure Portal.

Joining as a junior software developer - Paid internship, to:

- Development and design of applications using various programming languages such as PHP, JAVA, and C# from scratch.
- Assisting other colleagues in their tasks, such as monitoring servers and troubleshooting issues in 'RAK' applications.
- Redesigning the organization's website structure using tools such as Adobe XD and Photoshop.
- Fixing computer issues like LAN ports by installing security software and virus protection.

Junior PHP Developer - Training Internship, to:

- Study and analyze issues encountered in the archiving domain to construct a specification document.
- Design and development of an application aimed at solving the problem faced by the organization in the archives sector, using multiple protocols, and designed with a database that adheres to security standards and procedures.

EDUCATION AND DEGREES

2022 – 2023

Professional License Degree: SYSTEMES D'INFORMATION ET BIG DATA

Ecole Supérieure de Technologie de Salé.

2020 – 2021

Fundamental License Degree: LINGUISTIC STUDIES STREAM

Université Ibn Tofail – Faculte Des Langues – Lettres Et Arts De Kenitra

2018 – 2020

Academic Degree : ETUDES ANGLAISES

Université Ibn Tofail – Faculte Des Langues – Lettres Et Arts De Kenitra

2016 – 2017

Microsoft Certificate : En Html5, JavaScript et Css

Institut Spécialisé De Technologie Appliquée Maamora Kenitra

2016 – 2018

Specialized Technician Diploma : DÉVELOPPEMENT INFORMATIQUE

Institut Spécialisé De Technologie Appliquée Maamora Kenitra

2015 – 2016

Baccalauréat : SCIENCES DE LA VIE ET DE LA TERRE Idriss Premier - Kenitra

SKILLS

- Technologies: .NET (6, 7, 8), Entity Framework (EF)
- Languages: C#, PHP, Java, JavaScript
- Frameworks: ASP.NET, ASP.NET MVC, ASP.NET Core, Blazor (Web & WebAssembly), ReactJs
- Databases: SQL Server, MySQL, Redis, Firebase
- Architectures: Microservices, APIs, Clean Architecture (DDD & Onion Architecture)
- Tools & Practices: CI/CD, Git, Docker, API Gateways, SonarQube, Azure services
- Software Development Principles: YAGNI, SOLID, KISS
- Methodologies: Agile (Scrum), Devops

- Testing: TDD, Unit Testing, Integration Testing, Functional Testing
- Project Management: Project Analysis and Design, Reporting
